Probability Distributions

$X \sim \text{Bin}(n, p)$

n= p=

x=

Help Formulas Moments

Probability Distributions

$X \sim \text{Bin}(n, p)$

1. Probability Mass Function:

$$f(x) = P(X = x) = \binom{n}{x} p^x$$

where

- $n = 1, 2, 3, \dots$
- $0 \leq p \leq 1$
- $x = 0, 1, \dots, n$

2. Mean:

$$\mu = E(X) = np$$

3. Variance:

$$\sigma^2 = \text{Var}(X) = np(1 - p)$$

12:08

Probability Distributions

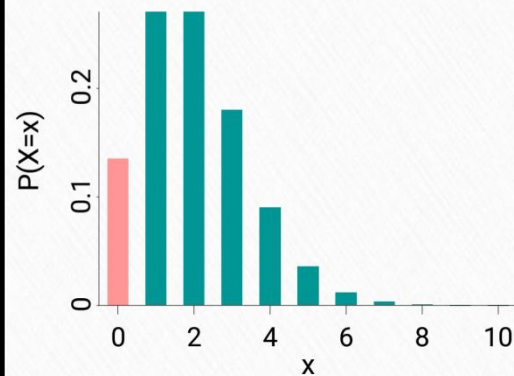

$X \sim \text{Pois}(\lambda)$

$\lambda = 2$

$x = 0$

$P(X=x) =$

0.13534
